

NAME : YELIGINTI MAHENDRA SAI
BRANCH : CSE
BATCH START DATE : 24-11-2025
BATCH END DATE : 28-11-2025
PROJECT TITLE : StudyPlanner Ai
PROJECT LINK : <https://my-site-2wch5vkt-yeligintimahendras.wix-vibe.com/>

SCREENSHOT OF WEBSITE :

The Solution

Intelligent Planning, Zero Complexity

A no-code platform that transforms academic chaos into an organized, adaptive study system powered by AI.

Subject Management

Organize all your academic subjects with custom color codes, difficulty levels, and credit hours in one centralized dashboard.

Deadline Tracking

Never miss an assignment again. Track all deadlines with visual priority indicators and automated countdown timers.

Exam Scheduler

Input exam dates, times, and locations. The AI automatically increases study intensity as exams approach.

AI Timetable Generation

Intelligent algorithms create balanced daily schedules that maximize productivity while preventing burnout.

Smart Reminders

Receive timely notifications for assignments, exams, and scheduled study sessions to maintain consistency.

Progress Analytics

Interactive dashboards display completion percentages, performance metrics, and improvement trends visually.

Project Description :

The AI-Powered Smart Study Planner is a simple no-code website that helps students organise their daily studies. Students can add their subjects, assignments, exams, and free study hours to the website. The built-in AI then creates a personalised study timetable for them. It also identifies weak subjects and gives more time to those areas. The planner sends reminders for homework, tests, and study sessions so students don't forget anything. If a student misses a session, the timetable adjusts automatically. The website is easy to use, works on both mobile and laptop, and does not require any coding knowledge. Its main goal is to help students manage time better, study consistently, and reduce stress.
